Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$25,000 in the Fund. Certain financial intermediaries also may offer variations in Fund sales charges to their customers as described in Appendix A to the statutory Prospectus. More information about these and other discounts is available from your financial professional and in the “Your account with the Fund” section on page 10 of the Fund’s statutory Prospectus, the “Class A Shares” section on page 10 of the Fund’s statutory Prospectus, the “Breakpoints/Volume Discounts and Sales Charge Waivers” section on page 41 of the Fund’s Statement of Additional Information (“SAI”), and Appendix A to the statutory Prospectus.

Total Annual Fund Operating Expenses After Fee Waiver	<u>1.15%</u>	<u>0.90%</u>

(1) Davidson Investment Advisors, Inc. (the “Advisor”) has contractually agreed to waive all or a portion of its management fees and pay expenses of the Fund to ensure that Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses (“AFFE”), taxes, interest expense, dividends on securities sold short and extraordinary expenses) do not exceed 1.15% of average daily net assets of the Fund’s Class A shares and 0.90% of average daily net assets of the Fund’s Class I shares (the “Expense Caps”). The Expense Caps will remain in effect through at least October 27, 2018, and may be terminated only by the Trust’s Board of Trustees (the “Board”). The Advisor may request recoupment of previously waived fees and paid expenses from the Fund for three years from the date they were waived or paid, subject to the Expense Caps.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (taking into account the

Expense Caps only in the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class A	\$611	\$877	\$1,164	\$1,977
Class I	\$92	\$319	\$565	\$1,269

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 27.68% of the average value of its portfolio.

Principal Investment Strategies of the Fund

Under normal market conditions, the Fund invests at least 80% of its net assets (including any borrowings for investment purposes) in equity securities across a wide range of market capitalizations and investment styles with attractive fundamental characteristics. The Fund looks for companies with reasonable valuations, prudent debt levels, cash flow generation, attractive growth characteristics and solid balance sheets. The Fund will invest its assets in both value and growth stocks, as well as dividend-paying and non-dividend-paying stocks. The Fund will seek to achieve its investment objective primarily through stock selection, with less emphasis on sector weightings. As a result, the Fund expects to only occasionally make modest sector changes, preferring to differentiate performance by relative movement in individual stocks rather than in sectors or industries.

The Fund may seek to enhance returns through the use of other investment strategies such as options (for hedging purposes), foreign securities (which may include American Depositary Receipts (“ADRs”), dollar-denominated foreign securities, or direct investment in foreign securities, including those in emerging markets), and other investment companies (including exchange-traded funds (“ETFs”)). The Fund may invest up to 25% of its net assets in foreign securities. The Fund may invest up to 20% of its net assets in put and call options and up to 20% of its net assets in other investment companies.

The Advisor may sell a position if the fundamentals have deteriorated, catalysts fail to develop, or a stock exceeds fair valuation. The Advisor may also sell a position if a better alternative becomes available.

At the discretion of the Advisor, the Fund may invest its assets in cash, cash equivalents, and high-quality, short-term debt securities and money market instruments for temporary defensive purposes in response to adverse market, economic, political or other conditions.

Principal Risks of Investing in the Fund

Losing all or a portion of your investment is a risk of investing in the Fund. The following principal risks could affect the value of your investment:

- **General Market Risk.** Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions.
- **Equity Risk.** Stock prices may fluctuate widely over short or even extended periods in response to company, market, or economic news. Stock markets also tend to move in cycles, with periods of rising stock prices and periods of falling stock prices.
- **ETF and Mutual Fund Risk.** When the Fund invests in a mutual fund or ETF, it will bear additional expenses based on its pro rata share of the mutual fund’s or ETF’s operating expenses, including the potential duplication of management fees. The risk of owning a mutual fund or ETF generally reflects the risks of owning the underlying securities the mutual fund or ETF holds. The Fund also will incur brokerage costs when it purchases ETFs.
- **Foreign and Emerging Market Securities Risk.** Foreign securities are subject to special risks. Foreign securities may be more volatile and less liquid than domestic (U.S.) securities, which could affect the Fund’s

investments. Securities markets of other countries are generally smaller than U.S. securities markets. These risks are enhanced in emerging markets.

- **Management Risk.** Your investment in the Fund varies with the success and failure of the Advisor’s investment strategies and the Advisor’s research, analysis and determination of portfolio securities.
- **Issuer Risk.** The value of securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value due to reasons directly related to the issuer, including management performance, financial leverage, and reduced demand for the issuer’s goods and services.
- **Options Risk.** Options on securities may be subject to greater fluctuations in value than an investment in the underlying securities. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks.
- **Small and Medium Companies Risk.** Investing in securities of small and medium capitalization companies may involve greater volatility than investing in larger and more established companies because small and medium capitalization companies can be subject to more abrupt or erratic share price changes than larger, more established companies.

The Fund may be appropriate for investors who:

- Have a long-term investment horizon;
- Want to add an investment with potential for capital appreciation to diversify their investment portfolio; and
- Can accept the greater risks of investing in a portfolio with equity holdings.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary, the Fund and/or the Advisor or its affiliates may pay the intermediary for the sale of Fund shares and related services.
